

Engineering

at

Chemeketa Community College

go.chemeketa.edu/engineering

Engineers play an essential role in the technical building blocks of society. Huge earthmovers, super computers, space probes, lifesaving medical equipment, super efficient power plants, or a modern freeway; engineers are involved in design, construction and operation of new developments and technologies. Engineers are indispensable in almost every area of society.

Chemeketa offers programs that closely follow the first two years of study at many public and private universities. In most cases, students are able to complete the first two years of a Bachelor's of Science Degree in Engineering at Chemeketa before transferring to a university for completion.

In this advising guide, you will find lists of classes that you can take at Chemeketa Community College and then transfer to several different universities as you pursue one of a number of different engineering disciplines.

Questions?

Contact: Halston Tuss, P.E.

halston.tuss@chemeketa.edu

Spring 2021

Answers to Important Questions:

How do I know I would like engineering?

Most engineers enjoy solving problems and helping people. Typical engineers like to plan or design and then build things. Having math and science skills or the willingness to learn these is also important.

What classes should I take while at Chemeketa?

On the following pages you will find several lists of classes that you can take at Chemeketa to complete the first two years of many engineering disciplines before transferring to a variety of universities.

What if the kind of engineering I want to study is not listed or available?

If the following pages do not contain a program of study for the kind of engineering discipline that you want to pursue it may, in many cases, be a simple matter of contacting an engineering advisor (Halston Tuss, P.E. halston.tuss@chemeketa.edu) to have a curriculum constructed for your particular engineering discipline. If the engineering discipline is not offered at an Oregon university then you might consider an alternative. For example, structural engineering is usually studied as a subcategory of civil engineering. Automotive engineering and robotics are often covered by mechanical or electrical engineering classes depending on the specialty.

Do I have to be accepted into the program at Chemeketa?

No, as long as you are a registered Chemeketa student and meet the class prerequisites you can start taking engineering classes.

If I need help with my schedule whom should I talk to?

Students are strongly encouraged to stay in contact with an engineering advisor at Chemeketa (Halston Tuss, P.E. halston.tuss@chemeketa.edu) in addition to an advisor at the school where they intend to transfer. See attached pages for contact information. Proper advising is very important because many classes have very restrictive prerequisites and many classes are only offered one time per year.

What if I am not ready to start with MTH251?

Students may start the program with MTH112 in place of MTH251. The student will then have to catch up by taking MTH253 the following summer if it is required.

What degree do I get at Chemeketa?

The class lists on the following pages do not, in most cases, satisfy the requirements for any associate degree through Chemeketa. Most engineering students simply transfer credits to the university on the way to a bachelor's degree. Students that want to pursue an associate degree through Chemeketa are encouraged to contact an advisor.

Students are encouraged to contact Halston Tuss, P.E. (halston.tuss@chemeketa.edu) at Chemeketa Community College for individual advising.

Students are encouraged to contact an advisor at PSU (<https://www.pdx.edu/cecs/academic-advising>) as early as possible to learn of any possible changes and deadlines.

* Requires DRF 130 or equivalent prerequisite.

HUM or SS -->Indicates humanities or social science electives that satisfy the arts and letters requirements for PSU.

NOTE #1 Students that have never used spreadsheets in a technical environment are encouraged to take GE 103.

NOTE #2 Students should plan on taking PSU's ECE 171 and 172, or equivalent.

NOTE #3 Students wanting to become professional engineers are strongly encouraged to take EGR 201.

NOTE #4 Environmental engineering students need to take BI234 and its prerequisites.

Students are encouraged to contact Halston Tuss, P.E. (halston.tuss@chemeketa.edu) at Chemeketa Community College for individual advising or for help with engineering disciplines not shown above.

Students are encouraged to contact an advisor at OSU (<http://enr.oregonstate.edu/>) as early as possible to make contacts and learn of any possible changes.

HUM or SS - Indicates humanities or social science electives that satisfy the Western Culture, Cultural Diversity, Literature and Arts, Social Processes and Institutions and Difference/Power/Discrimination categories in the Perspectives section of OSU's Baccalaureate Core. See the last page of this guide.
 No more than two courses may be from the same department.

- Mechanical Engineering requires EC 201 or EC 202 for the Social Processes and Institutions category.**
- Civil Engineering requires EC 201 for the Social Processes and Institutions category.**
- Energy Systems Engineering requires EC 201 for the Social Processes and Institutions category.**
- Architectural Engineering requires EC 201 for the Social Processes and Institutions category.**
- Architectural Engineering also requires PHL 203 for the Western Culture category.**

- NOTE #1** Electrical & Computer Engineering students wanting to become professional engineers or to take classes in Energy Systems, Robotics and Control are strongly encouraged to take EGR 211 and EGR 212.
- NOTE #2** Electrical & Computer Engineering students are strongly encouraged to take EGR 214. While the classes will not transfer directly, the material will be foundational for Junior and Senior study. It is also recommended that Electrical & Computer Engineering students take OSU's ECE271 & 272 or an equivalent at another institution to prepare for Junior level study.
- NOTE #3** Industrial or Manufacturing Engineering students are encouraged to take OSU's ME250, IE212, ENGR390, IE255 and IE / MFG 285 at OSU before their Junior year.
- NOTE #4** Energy Systems Engineering students are encouraged to take OSU's IE212 and BA215 at OSU before their Junior year.

* Requires DRF 130 or equivalent prerequisite.
 ** To satisfy OSU's Baccalaureate Core. See the last page of this guide.
